It is undeniable that the Professional and Technical State Schools in Brazil have been experiencing their best moment. The Federal Government, in the last five years, has been implementing an unprecedented expansion process that aims at the consolidation of the quality of the Technical State Education in Brazil.

A new law from 2008 created a new model of Education, Science and Technology in the State Institutes of Education and, by the end of 2010, 214 new State Technological Schools were implemented all over the country, triplicating the number of students in these institutions. However, the investments were not only on infrastructure, but a large amount of money was also invested on the qualification of the teachers and administrative technicians.

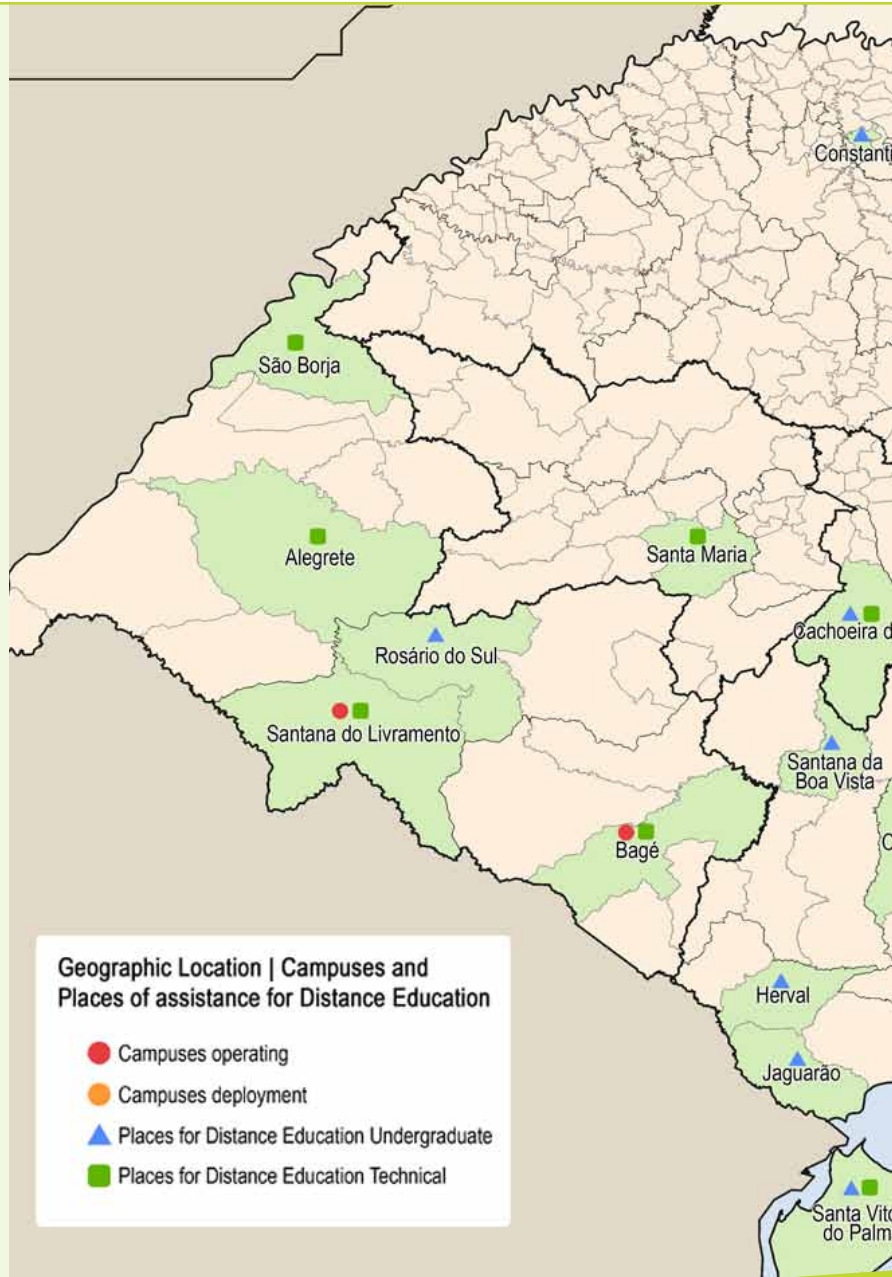

One of the main objectives of this huge investment on Technical Education was to qualify the different campuses around the country to find technological solutions for the regional problems within the area they are located. These actions have given the opportunity of access to an education of quality to those who had no options before, giving them a chance of a promising future. It has also moved local economies and prepared professionals that will make the difference in the labor market.

In the State of Rio Grande do Sul (South of Brazil), IFSul has over 9,000 students enrolled in nine campuses and there are other three campuses being implemented at the moment. We have 1.3 thousand employees that regularly attend training programs, a policy that reflects positively on the quality of the education. One of our main differentials is the verticalization of our system of education, which allows us to offer secondary education, undergraduate and graduate courses.

We are aware that a lot has been done, but we also understand that it is only the beginning of a work that will reflect positively on the destiny of our nation. This is the reason why IFSul works thinking about the future and the best way to fulfill the society's aspirations. A good example of our concern with the society is a pioneer project of implementation of a Technical State School on the border of Brazil with Uruguay (Santana do Livramento – Rio Grande do Sul State) in association with the *Consejo de Educación Técnico Profesional - Universidad del Trabajo del Uruguay*, where bi-national technical courses are offered to both Brazilians and Uruguayans living in this area.

A State Institute of Education with lots of opportunities, this is the main goal of our administration. This is also the reason why we are working so hard in the search of international partnerships that will not only allow our employees and students to expand their knowledge on various areas of study, but also help us to invest on the development of applied research and technological innovation.

Antônio Carlos Barum Brod
IFSul Chancellor

IFSul is part of the Brazilian net of Professional, Scientific and Technological Education schools and it was implemented in Pelotas in 2008. We are a state institution that has financial, patrimonial, administrative, disciplinary and didactic-pedagogic autonomy. We offer free and qualified secondary, professional and superior education and we have been developing research and extension projects in different areas.

IFSul is located in Pelotas (RS-Brazil) and it comprises 9 campuses: Pelotas, Pelotas – Visconde da Graça, Sapucaia do Sul, Charqueadas, Passo Fundo, Bagé, Santana do Livramento, Camaquã, Venâncio Aires. In Distance Education, IFSul has professionals that provide local assistance all over the state.

Chancellor's Office

Chancellor: Antônio Carlos Barum Brod

The chancellor's office is located in Pelotas (RS-Brazil) and it is responsible for the coordination of the 8 Campuses.

Contact

Address: Rua Gonçalves Chaves, nº 3798

Praça José Bonifácio, nº 3

Praça José Bonifácio, nº 1

The office of Education is responsible for planning, supervising, coordinating and promoting educational activities and policies related to research and extension programs.

Its aim is to define the guidelines for all the research, innovation and graduate activities in all the campuses of IFSul. It involves teacher training, research promotion and the offer of graduate courses. The actions are in accordance with the needs of the local and regional society, aiming at the economic and social development.

PROEX plans, supervises, coordinates and promotes the extension activities (research and education) and policies and their relation with the society.

This office plans, supervises, coordinates and promotes the activities and policies related to planning, administration and budget, financial and patrimonial management in IFSul.

This office plans, supervises, coordinates and promotes the activities and policies of development and articulation between the different offices and campuses.

Address

Praça Vinte de Setembro, 455
